

Personal Protective Equipment Distribution Plan 12-23-20

The City has identified over 90 essential businesses within our community to receive the first distribution of PPE. These businesses include restaurants, hotels, rehabilitation and recovery centers, assisted living facilities, retail goods and personal services providers, non-profits, business and professional services, financial institutions-banks, and building contractors.

The City is disbursing the equipment based on this essential business list, commencing distribution Monday December 21 at noon, finishing Tuesday, December 22 at 5 pm.

We thought it was important to do the first round of distribution ahead of the holiday. We will start the second phase of distribution to non-essential businesses following the first of the year.
